- Los últimos días de agosto – antes del Día de Labor (4 de septiembre) y el ultimo día a mediados de junio (10-14)
- Los primeros días de septiembre – después del Día de Labor (4 de septiembre) y el ultimo día a mediados o a finales de junio (17-21)

English Survey Additional Comments:
--

- Middle School items and events like sports practice start dates and other items similar to the High School items and events. This is a school calendar and it seems that middle school is left off. Also, other public community events like Memorial Day, Veterans Day and other events that may be pertinent to school students and staff.
- Stating before Labor Day really interferes with family's ability to do last minute Labor Day vacations. Especially us locals who have businesses. Labor Day weekend is often the ONLY opportunity for us to take time off because we have to be in our businesses all summer to serve tourists.
- Make sure we still have 2 weeks for Christmas break. Thanks.
- Mid winter break - the week of Presidents Day
- That doing break would be around the Easter holiday. I would rather the kids get out early for Christmas break as well to go back to school early January. There's more to do before Christmas than hanging out after New Years.
- Full week off in Feb.
- If starting before Labor Day, I would be fine going until later in June if there were snow days built into the calendar. That way, if another event causes schools to close, instead of an array of paperwork and conversation, there are some Fridays already set with that in mind: no school closures, it's an extra day in a weekend; school closure will automatically set classes on the prearranged date.
- We enjoy having an extra day off after New Years and mid-winter break.
- Do your damn job and educate these kids
- Testing
- Mid-winter break over state basketball weekend.
- Shortening the mid-winter break during President's day holiday. Building in snow/weather makeup days into the calendar so that the school year doesn't have to be extended to make days up. With all the learning time we have lost due to the pandemic it seems crucial to be using school days for learning and not adding days onto the end of the year when students and teachers are already exhausted. Bottom line, it feels that the school calendars the past few years have been more suited to the school staff than the student learners. Would like to see that shift.
- Thank you for the opportunity to share!!!
- Before Labor Day starts are hard in our kids who have summer jobs and our businesses who need staff through that busy weekend.
- No
- Make-up snow or power outage days come from mid-winter break.
- Late start is awful.
- None
- Two weeks for Christmas Break!
- Less half days, no late start and less random days off. Education is highly disrupted with late start, half days and random days off.

- Make sure we still have 2 weeks of Christmas break please!
- Boys and girls club
- Would love to be out by Memorial Day. Kids are ready to be done by then!! The testing is done in May so the last few weeks of school are a waste of time.
- Professional Day should be done during summer break so the school year can be more condensed.

Spanish Survey additional comments

- I respect the opinion of the majority
- Take more care of the kids so they can eat all their food
- None
