

Board Self-Assessment

What is it?

WSSDA's online Board Self-Assessment survey is an easy-to-use tool that helps school boards assess and strengthen their performance in governing for improved student learning. Research-based and scientifically validated, the survey is based on the Washington School Board Standards.

How does it work?

1. Board members complete a 15–20-minute survey from any computer or mobile device.
2. Date set for completion of survey
3. Once all members complete the survey a workshop is scheduled
4. Report can be ready in about 24 hours

Sample Report:
